1- Download

2- Install

3- Register

2. Installation steps

- 2.1 A wizard will be launched that will help you through the setup process:

- 2.2 Click next to continue or click Cancel if you want to quit installation.
- 2.3 BitDefender Internet Security 2010 will alert you if you have other antivirus products installed on your computer. Click Remove to uninstall the corresponding product. If you want to continue without removing the detected products, click next.

You should uninstall any other antivirus products installed on your computer before installing BitDefender. Running two or more antivirus at the same time on a computer usually renders them all unusable.

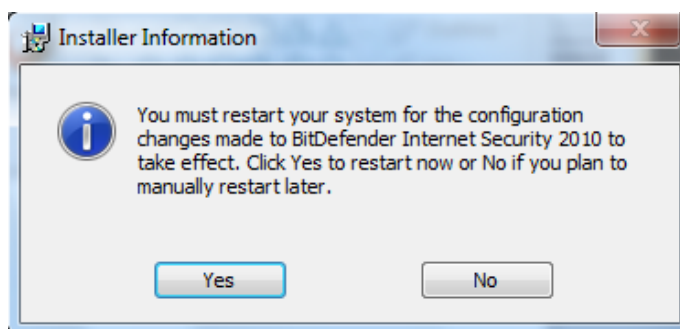

1- Download

2- Install

3- Register

- 2.4 Please read the License Agreement, select I accept the terms in the License Agreement and click Next. If you do not agree with these terms click Cancel. The installation process will be terminated and you will exit setup.
- 2.5 A window will open asking you to choose the installation type if you want it to be typical or custom.
 - 2.5.1 Typical: this option is to install the application using the default most known settings.
 - 2.5.2 Custom: this option is to install the application by choosing every single setting you want to add.
- 2.6 Then Click Finish to complete the installation

Note You might be asked to restart your system to complete the installation process.

1- Download

2- Install
